

Degree in Medicine (UCM) in 2003 and specialist in Radiology (Hospital Clínico San Carlos) in 2008. Currently Medical Director of the CT and MRI service of the Hospital Ntra. Sra. Del Rosario in Madrid, member of SERAM, ESC and SEICAT (being part of the board of directors of the latter society). He has completed his residency and worked for 10 years at the Hospital Clínico San Carlos in Madrid. He did a visiting fellowship in radiology at Stanford University Hospital in Palo Alto (California, USA). Since 2008 he has focused on oncology and cardiovascular imaging with CT and MRI, starting new techniques at the Hospital Clínico San Carlos and Hospital Ntra del Rosario. He is currently involved in more than 120 active clinical trials, mostly in oncology. His main fields of research are oncology (breast, digestive and genitourinary tumors), myocardial structural disease with 3T, and spectral detection CT in cardiovascular field. Dr. Vañó is a regular speaker at national and international courses and congresses, author of several articles and book chapters and passionate about teaching (from the technique to the detail of interpretation), receiving several visitors each year in his service.
