

Victor Moreno MD, PhD, Biosketch

Victor Moreno, MD, PhD is the Director of Clinical Research at START-Madrid-FJD. He obtained the Medical Degree by the University Complutense of Madrid in 2004 and completed his specialized formation in Medical Oncology at Hospital Universitario La Paz during 2005 and 2009. During 2008-2010 he obtained the Master Degree in Molecular Oncology by the CNIO (Spanish National Cancer Research Centre, Madrid). He obtained his PhD Doctorate, with European Mention and highest commendation in 2013 for his translational research in rectal cancer.

After finishing the residency period he obtained the *Excellent Resident Grant*, awarded to complete his training in Phase 1 oncology clinical trials in the Drug Development Unit of the Royal Marsden Hospital (Sutton, UK) during 2010-2011.

After the completion of the Fellowship, he returned to a Consultant position in Medical Oncology to the Hospital Universitario La Paz where he was member of the Neuro-Oncology and Gastrointestinal Tumors section and coordinator of the Oncology Phase I Unit. In 2013 he joined the initiated the Phase 1 program in the new center *START-Madrid-Fundación Jimenez Diaz (FJD)* as Clinical Researcher dedicated exclusively to early clinical trials and drug development with special focus on targeted therapies, cancer immunotherapy and adoptive cell therapy. His team has been actively involved in development of modified TCR for solid tumors including MAGE A10, MAGE-A4 and NY-ESO as well as TILs for different solid tumors. He has published more than 40 articles in main journals such as *The New England Journal of Medicine*, *Nature*, *Journal of Clinical Oncology* and *Lancet Oncology* among others.
