

Eduardo Zatarain Nicolás, MD, PhD, is a clinical cardiologist since 2012, who has completed his training in Clinical Cardiology at Hospital General Universitario Gregorio Marañón. His clinical and research activity has been developed in the causes of heart failure and its management in the advanced setting, from genetic cardiomyopathies to the toxic damage and cardio-oncology. In 2017 he obtained his PhD grade in the Universidad Complutense at Madrid and he has developed his teaching career during those years in post-graduate masters related to heart failure and cardio-oncology. Member of the IC-OS, the Cardio-oncology Council of ESC and the Work group of cardio-oncology from the Spanish Society of cardiology, he is developing actual research in the field of cardio-oncology. Nowadays, he coordinates the local cardio-oncology group at Hospital General Universitario Gregorio Marañón.
